

DATASHEET

02.710

COMBUSTION ADDITIVE

OIL, GAS, 2_STROKE

SPECIFICATIONS

- appearance : fluid liquid
- smelling : without
- Color : Blue
- reaction : neutral PH
- Flammability : boiling point > 60°C
- Resistance to cold > - 20 ° C

USES

The 02.710 is a new product designed to improve thermal oxidizer systems / fuel and that on several points:
Reduce unburned = less CO2 emissions (greenhouse gas emissions).
Reduce wear by carbon fouling.
Reduce vibration for power transmission systems in different areas.
Reduce the thermal space explosions and therefore reduce consumption equal performance.
Increase the longevity of mechanical systems.
Protect the fuel oxidation distribution.

INSTRUCTIONS

Is used at a rate of 20 ml per 80 liters of fuel.
To use engine type of competition: 20 ml per 10 liters of fuel.
Construction Gardening: 10 ml per 10 liters.

SAFETY PRECAUTIONS

It is essential to obtain a fuss start to mix the product in all the fuel (static, use the create movement when filling).

Product reserved for the industry.

NB : Our information is given in good faith.

When using other than those mentioned above, we disclaim any responsibility.
